Company Overview

Company Name : Pacific Silicone JSC
Founded : September 2021
Headquarters : Hoa Binh City, Vietnam

Pacific Silicone Company is a pioneering company in the field of Silicone Oil recycling in Vietnam, making significant contributions to sustainable development, promoting the circular economy model, and protecting the environment.

Mission Statement

We are committed to becoming a pioneering enterprise in the silicone oil recycling industry, contributing to sustainable development through innovative and environmentally friendly solutions. With a mission to protect the environment and promote a circular economy model, we strive to consistently deliver high-quality products, minimize environmental impact, and build a green, sustainable future for future generations.

Vision Statement

To lead the way as Vietnam's foremost company in sustainable silicone oil recycling and eco-friendly material production, setting the standard for innovation and responsibility in environmental protection. We envision a future where circular economy principles are central to industrial progress, fostering a cleaner environment and a healthier planet for all

Core Values

Core values are fundamental beliefs that guide a company's actions, decisions, and culture. Here are core values in Pacific Silicone Company.

- Quality
- Innovation
- Responsibility
- Safe
- Sustainable development

Process and Product

Pacific Silicone has been granted a **Certificate of Compliance** with environmental protection requirements for importing scrap materials as production raw materials by the Ministry of Natural Resources and Environment of Vietnam.

Process

1. Collection and Crushing of Waste
2. Pyrolysis
3. Purification of DMC Oil
4. Production of Silicone Oil
5. Cooling and Filtration
6. Packaging of Finished Products

Product

The main product of this process is **Dimethyl Silicone Oil 201**, a widely used silicone oil known for its outstanding properties such as thermal stability, chemical resistance, and non-toxicity. **Dimethyl Silicone Oil 201** is a high-quality, environmentally friendly product used across various industries, including rubber production, silicone adhesives, textiles, leather, automotive, and metal care products.

Target Market

Pacific Silicone's Target Market includes industries that produce silicone-based products, textiles, and leather, as well as automotive and industrial maintenance sectors that use silicone oil in their manufacturing processes. We also target manufacturers of polishing additives and brands committed to sustainable development. Our goal is to meet customer needs for minimizing environmental impact and promoting a circular economy model

Company Achievements

Advanced Technology

Collaboration with Leading Organizations

Environmental Protection Certification

Large Production Capacity

High-Quality Products

Conclusion

With a commitment to sustainability and environmental stewardship, we strive to innovate and lead in the silicone oil recycling industry. By aligning our efforts with the principles of the circular economy, we aim to not only reduce environmental impact but also create lasting value for our partners, customers, and communities. Together, we're building a greener future, one where industry and ecology thrive hand in hand.
